# The 64th CREST Open Workshop - SSBSE Challenge Track: Collaborative Jam Session

August 3-4, University College London, London

https://www.ucl.ac.uk/crest/events/2023/aug/64th-crest-open-workshop-ssbse-challenge-track-collaborative-jam-session

The purpose of this CREST open workshop is to draw together those in the community interested in collaborating on submissions to the

SSBSE Challenge track

The SSBSE Challenge track is a good opportunity for new researchers to join the SBSE community and develop a taste and gain practical expertise in the field. It also allows researchers to apply techniques and tools to real-world software and to discover novel practical (or even theoretical) challenges for future work

Organisers: Dr. Justyna Petke, Prof Federica Sarro
